The JM560, JM546 and JM25 all provide a high level of protection from both physical attack and manipulation. These locks should be specified where security is required and are particularly useful in the upgrading of such by their use as replacements for older style single and two lever locks. These locks can be double sprung on request.

The JMHSL 546 & 560 are 5 lever claw type sliding locks with good security. No protruding cylinder enables the door to slide flush into the door cavity. The claws are flush when unlocked. Can be keyed alike with other 5 lever locks but only to certain key profiles. They feature very strong 5mm thick Stainless Steel claws. The claws throw vertically up and down to prevent track jumping if under attack. Small lock body size for minimum wood removal. 3mm thick forend & striker made from stainless steel in satin chrome plate finish.
