

*Come home
to the
Big Baker's Oven.*

NECTRE

SLOW COMBUSTION HEATING

If we told you the original and very traditional, Baker's Oven is so popular that it can be found in cottages and country homes all around Australia and even overseas, you could say; "that's old news". Well here's some big news. The new Big Baker's Oven has arrived!

It's the perfect answer when you have a large open plan home or an expansive area such as a sporting club or cellar door but are drawn to the unique charm and versatility of a Baker's Oven.

With the ability to heat up to 180 square metres, the Big Baker's Oven will add character with cooking and heating versatility to all sorts of places. The large cast iron doors with stay cool spring handle and huge glass viewing area provide a pleasant atmosphere; even before the penetrating radiant heat from the living fire inside spreads it's warmth. And, while you bask, you can feed the masses using the cook top or the huge baking compartment, big enough for a couple of large roasts.

BIG BAKER'S OVEN FEATURES:

- Radiant/convection oven
- Heats around 18 squares (180m²)
- Weight: 220Kg
