950X
Gas Log Flame Fire
The 950X represents a new generation of gas fires for Rinnai. Designed to meet the highest expectations in terms of simple installation, powerful heat output, energy efficiency and flueing flexibility, the 950X is the future of fire.

This gas log fire offers a mix of modern frames and burn media options, giving you the ultimate flexibility to create a space that is your own. The classic ‘cut wood’ look of the Australian Eucalyptus Log Set provides a beautiful dancing flame, whilst the glowing Pebbles radiate warmth with a modern twist.

**Features and Benefits**

> Incredibly energy efficient with a top-of-the-range 5 star rating.
> Powerful heating performance over 8kW, perfect for open plan living and large areas.
> Modern or classic? Select either pebbles or logs to suit your style.
> Stainless steel or black? Select a fascia option to match your tastes.
> Safety mesh guard to give peace of mind and eliminate reflections.
> Thermostatic control - set the temperature and relax.
> Flexible flueing options.

Spread the warmth and comfort with a 950X Gas Log Fire.

**Installation Options**

Whether you are building a new home, working through a major renovation or just want to revamp your living room, the Rinnai zero clearance option is the perfect solution to creating a new space.

If your home doesn’t have an existing fireplace, creating a false fireplace is the next best thing. To ensure an easy installation into a timber frame or other combustible materials, the Rinnai 950X is designed with an integrated zero clearance box.

### Creating a False Fireplace

1. **Timber frame**
2. **Addition of flue**
3. **Addition of plasterboard**
4. **Finished internal wall**

For an alternative installation to a false fireplace, the Rinnai 950X can be installed into a weatherproof box. A cavity is cut into the existing blank wall and the fireplace is installed onto a bracket that allows the back of the fire to sit outside housed in a tightly sealed box. This option allows the fire to be built into an existing wall without taking up any extra space in the room. The weatherproof box is sold separately.

### Weatherproof Box

1. **Existing blank wall**
2. **Cavity cut-out**
3. **Engine, flue and weatherproof box installed**
4. **External wall view**

### Flueing Options

- **Rear External Wall**
- **Vertical**
- **Through Wall**
- **Sideways Through Wall**
- **Down and Out**

**Please note:** Suitable for direct, vertical or horizontal flueing. 500mm required for down and out applications. See installation instructions for full details.
